NOTES

If Bryonia is indicated but doesn't help or only helps a little consider Cheledonium

Veratrum viride vs. Belladonna

Similarities: pulsations, livid appearance, high fever, delirium, dilated pupils. **Differences:** Bell has dry, hot skin whereas Veratrum has beads of sweat.

Bryonia vs. Chelidonium

Similarities: dusky appearance, slow onset, sharp/stitching pains, irritability, motion agg.

Differences: Chelidonium has a yellow tinge (face) and yellow tongue and wants hot drinks, Bryonia has a blue tinge (face), a white tongue and wants cold drinks.
